NEW PRODUCTS

To commemorate its 30 years in eyewear design, **Oakley** has launched the **Heritage** collection, which offers a fresh take on some of the brand's classics. Styles include a limited edition release of the Eyeshades, with an improved nose pad structure; the reissued Razor Blades, available in multiple lens-frame colour combinations; and the Frogskins, the brand's first dual-lens design. The collection also includes custom editions of some of its current eyewear such as the RadarLock and the Flak Jacket XLJ. <http://ca.oakley.com/store/collections/heritage-collection>

Those who attended London Fashion Week in February would have discovered the new styles created for **Silhouette** by **Annette** and **Daniela Felder**, the sisters behind the **Felder Felder** label. The sisters also designed limited edition eyeglass cleaning cloths. After that, the Austrian eyewear maker was not done with fashion events. In March, spectators watching the Akris fashion show in Paris saw the Silhouette aviator styles that were specially designed for the occasion. Distributed in Canada by **COS**. www.silhouette.com

Immagine 98 launched eight new optical styles for the **Rye & Lye** collection, distributed in Canada by **Mood Eyewear**. Wood, leather, and regenerated stone are the materials highlighted in these new pieces. This collection also includes two limited edition women's eyewear styles, adorned with Swarovski crystals. The Leonardo and Tiziano unisex frames are made with stainless steel and wood and enhanced with a flex hinge. The Caravaggio and Michelangelo frames for men are crafted from milled plastic and feature stone-effect inserts. www.moodeyewear.com

The eyewear manufacturer **Moko Besicles** and the Eric Tibusch Paris Couture fashion house have partnered to create **Eric Tibusch** brand sunglasses that are entirely hand-made in France, in Juras. The new sunglasses feature the styles and colours of both houses. Distributed in Canada by **Fame Optique**. www.fameoptique.ca

L'Amey America has introduced two new ophthalmic models, Weston Peak and Lassen Peak, to its **Columbia Performance Eyewear** collection. They feature stainless steel fronts with Columbia's exclusive H90™ injected plastic frame injection-moulded temples and bi-injected Gripol™ inserts. Distributed in Canada by **Centennial Optical**. www.centennialoptical.com

Modern Optical International has launched three new men's frames in its **Giovani di Venezia** collection. The Bennett is an angular frame available in neutral hues of black, brown, and gunmetal. The Louis features chunky temples and metal trim accents. Finally, the Olsen has

a rounded rectangular shape and slender temples. www.modernoptical.com

Eschenbach and **Ash Technologies** have updated their **Crystal XL** (version 2) video magnifier by adding new features and lowering its price by over 20%. The new 4.3" LCD screen is enhanced with anti-glare coating and an even wider range of magnification ranging from 1.5x to 14x. www.eschenbach.com

The new 4302 style by **Ogi Eyewear** features a cat-eye shape and many elaborate details, including circular embellishments and dynamic angles. The stainless steel design attracts attention with a pinched bridge that forms symmetrical cut outs. www.ogieyewear.com

Danish jeweler **Anette Wille** partnered with **ProDesign Denmark** to create the 5627-29 series of frames for women in the **Irls** collection. The hammered texture of the temples is complemented by antique metal colours to create a "jewel" look. Available in three shapes and in metal or acetate. www.prodesigndenmark.com

The new frame by **ROLF Spectacles**, Islero 41, an Optician Awards Frame of the Year 2014 finalist, is part of the "main stone" collection. Its layered structure of split shale rock offers natural variations in colour. Its design is inspired by Italian sports cars. www.rolf-spectacles.com

In Belgium, **Patrick Hoet** and his daughter, **Bieke**, each explore the potential of 3D laser printing. Patrick Hoet has launched some new frames that feature transparent titanium fronts with a bee-hive structure, and temples equipped with a titanium-based shape-memory elastic system. These models are part of his custom **Hoet Couture** eyewear collection. Bieke Hoet, who created the **Cabriolet** brand, has also launched a new style, the Cabriolet Storero, sold with various lenses and a selection of complex plastic 3D structures. www.hoet.be

MEI has released the **EzFit**, a compact ophthalmic lens milling machine that opticians can use in their offices. It can cut edges at different angles and, for any type of frame (semi-rimless, wraparound, etc.). While at Mido, MEI also introduced its Mei641 technology with TBA (Throw the Block Away), which helps control speed without the need for a finishing block. www.meisystem.com

Oklia made a comeback at Mido this year by launching its new **HDA® Faces** collection, designed using its patented HDA® technology. The fronts of the frames are magnetic and can be matched with a variety of ultra-thin (1.8 mm) and lightweight front films. Moreover, a metal hook holds the changeable front film tightly. www.okia.com
