nouvelle lunette modèle femme solaire par la marque OKIA

"BEJWELED ENSEMBLE" BY OKIA: WHEN EYEWEAR MEETS JEWELRY

Refined, graceful and precious: here comes "**Bejeweled Ensemble**", the brand-new OKIA collection which blends the extraordinary effects allowed by **HDA® Technology** with the charm of jewelry to propose unexpected seductive frames.

Each model from this lovely and stylish collection is subtly adorned with a special combination of crystal and metals, and each combination features a different pattern in order to meet the individual taste and assure the wearer that his frame is truly unique.

"Bejeweled Ensemble" is perfect for people who love classic frames and appreciate delicate details: the man or woman who demands the finest in sophisticated eyewear and wears their eyeglasses or sunglasses as a piece of jewelry instead of a simple accessory on their face.

The collection embodies the latest goal reached by OKIA by means of its patented HDA® Technology, offering a **surprising mix between luxury and high technology** and bringing the use of precious metals and stones from rings and necklaces to eyewear. The result is nothing short of stunning. The materials and patterns applied on these new frames make them a collectible treasure, transforming an everyday accessory into a timeless jewel.
