la nouvelle collection de lunettes féminines de Okia inspirée par Lace Pattern

OKIA PRESENTS A NEW FEMININE STYLE INSPIRED BY LACE PATTERN

OKIA is proud to present its latest extraordinary goal, reached through a continuous research and improvement of the patented **HDA™ Technology**: the new women's style inspired by **lace pattern** is indeed a really surprising blend of high technology and fashion that will seduce the feminine public through its glamorous elegance.

Inspiration can come from anywhere and, thanks to the incredible opportunities opened by HDA™ Technology, OKIA is able to translate every single inspirational image and idea into extremely detailed and lifelike eyewear decorations. In order to meet the needs of the most sophisticated and demanding women, OKIA has developed an original style that is an authentic masterpiece of design and innovation. Traditional hallmark of items like wedding dresses or veils, lace has recently become one of the hottest fashion trends: that is why OKIA has decided to put its refined pattern on eyewear, creating a special frame for a charming and contemporary look.

The pattern spreads from the endpiece to the temple bringing attention to the frame and giving it a deep touch of femininity. Gold metallic lines are realized through the **BMT technique** to enrich the pattern and create a subtle sense of luxury.

Combining a romantic and imaginative inspiration with the most developed results allowed by the patented HDA™ Technology, this new style is a perfect expression of both quality and fashion. A clever mix between a classical symbol of elegance and modern technology, it aims at women who search for a stylish and unusual accessory.
