

PAISLEY: NEW ARRIVAL AT OKIA

A NEW COLLECTION MADE ENTIRELY WITH HDA

Okia is being talked about again thanks to the new and eccentric Paisley collection made entirely with the consolidated HDA® technology.

Always true to itself, Okia continues to amaze its customers with unparalleled creations that are innovative, original and fun. The new models display all the brand's characteristics: colorful, joyous, carefree and eccentric. These frames are not for people who prefer a classic, traditional style or who follow the fashion dictates of the moment: on the contrary, wearers must have a totally unconventional and alternative look and spirit, a personality that is proud to be inescapably striking.

From the bridge to the end pieces, this eyewear is an explosion of brightness thanks to the patterns and shades of color created all over the frame by HDA® technology. BMT, a special, very precise engraving procedure that gives any pattern a brilliant metallic touch, is clearly visible along the temples and always combines perfectly with the HDA® decorations.

Give voice to your spirit and let yourself go to the exhilarating style of the Paisley Collection from Okia. Don't follow the crowd, be unique!
