

nouvelle collection de lunette "SHINE MINERAL" par la marque OKIA

SUMMER IS IN THE AIR!
DISCOVER THE "SHINY MINERAL" COLLECTION BY OKIA

Are you a summer addicted? Do you always dream of white sand beaches and crystal clear blue sea? Then the new "Shiny Mineral" collection launched by OKIA is waiting for you!

Entirely realized by means of the patented and well-consolidated HDA® Technology, "Shiny Mineral" takes its inspiration from the idea and feeling of gold sand. All pleasant and relaxing features of this natural element - lightness, softness and subtle tone - have been carefully transferred on the acetate base with a truly sensational outcome.

The new frames' temples exhibit refined wavy patterns, creating a quiet and peaceful atmosphere that will make you feel as if you were on a heavenly beach. Delicate shades of gold and pink - proposed in solid version or with a transparent effect - complete the harmonious graphics and give them an unmatched touch of elegance. An exceptional eyewear piece made of a perfect balance between creativity and high technology, "Shiny Mineral" shows how HDA® Technology can satisfy any customer's request, giving expression to any kind of inspirational idea.

Whether you are hours away from a coastline or steps away from golden sand, bring the beach on your eyewear choosing a "Shiny Mineral" frame!
