### Okia Lace Collection Unveiled

September 2012 — Nothing says vintage glam and romantic femininity than lace — and it's making a big comeback this fall.

Get this season's timeless look with the new Lace Collection by Okia, which takes its cue from the lace-trimmed designs of the fall fashion runways.

Available in tones of blue or black, the definition and depth of the lace design are achieved by Okia's patented HDA technology, merging high fashion and technology to create a must-have look for the fall. The collection includes both sunglasses and eyeglass frames.
