CREATE YOUR OWN COMPOSITE PATTERN WITH OKIA!

Stop wearing ordinary and conventional eyewear! The new Composite Pattern Collection by OKIA has arrived!

Considering the idea of patterns and colours mixtures as a starting point, this collection gives it a cool and contemporary twist. Shapes deriving from different imaginative worlds are mixed and

composed together on acetate, creating an odd and dynamic pattern according to every customer's taste. Thanks to the sensational opportunities offered by HDA(R) Technology, it will be easy to satisfy your individual desires combining natural, geometric or irregular patterns on your frame: feathers, squares and any other shape can be exhibited on acetate with an extreme definition effect by means of the bold colour-blocking.

The application of clashing colours will make your composite pattern even more singular: any creative, tonal or contrasting pattern combination can be worked indeed with deep bright colours - such as fuchsia, violet and blue - that will give you a stylish and refined look. A beautiful transparent effect - inspired to one of this summer main trends - completes the collection, giving it a touch of freshness and modernity.

The Composite Pattern Collection is perfectly suitable for both boys and girls. Thanks to its original and fashionable design concept, it offers a special and customized accessory for a unisex and extremely up-to-date look.
