

Experience The New 'Skin Of Colors' Eyewear Collection By OKIA

The new eyewear collection features animal patterns and a multitude of colours

Two keywords for this amazing collection: trendy and bold! 'Skin of Colors' is colourful, original and extravagant, good for those who love to push the boundaries of ordinary style.

Animal prints are one of the hottest fashion trends ever and keep on inspiring OKIA designers. The new 'Skin of Colors' collection offers an unexpected combination of animal patterns and brilliant colours, expressly conceived for the most demanding and stylish women. Peacock, leopard, crocodile, giraffe and snake – animals embodying pure seduction, charm and elegance – are just some of the proposed concepts.

The animal patterns are realised on the frames' temples by means of both HDA® Technology and BMT (Beautiful Metallic Touch) technique, a special application which allows ultra-sharp cutting for all patterns and gives them an illuminated metallic effect. In addition, the use of SY technique makes even the tiniest detail perfect, combining innovation and quality into pure luxury.
